

## MULTIPLEX DISTRIBUTOR (ELECTRICAL)

### EXTERNAL DISTRIBUTION UNIT

#### PRODUCT DATA SHEET

### Description

Optimize your industrial laundry system with our advanced External Laundry Dispensing Unit, designed to connect multiple washers to our dispensing unit. With configurations from 3+1 to 10+1 channels, this high-performance unit offers versatility and efficiency.

### Key Features:

**Flexible Configurations:** Choose from 3+1 to 10+1 channels to suit your specific industrial laundry needs.

**Electric Solenoid Valves:** Ensure precise and reliable control with these valves, optimizing chemical distribution.

**Simple Integration:** Easily connects to our industrial laundry units, improving operational efficiency.

**Total Compatibility:** Designed to work in harmony with our dispensing unit, ensuring efficient dispensing.

**Robust Construction:** Durability guaranteed to withstand the demands of industrial environments, minimizing maintenance.

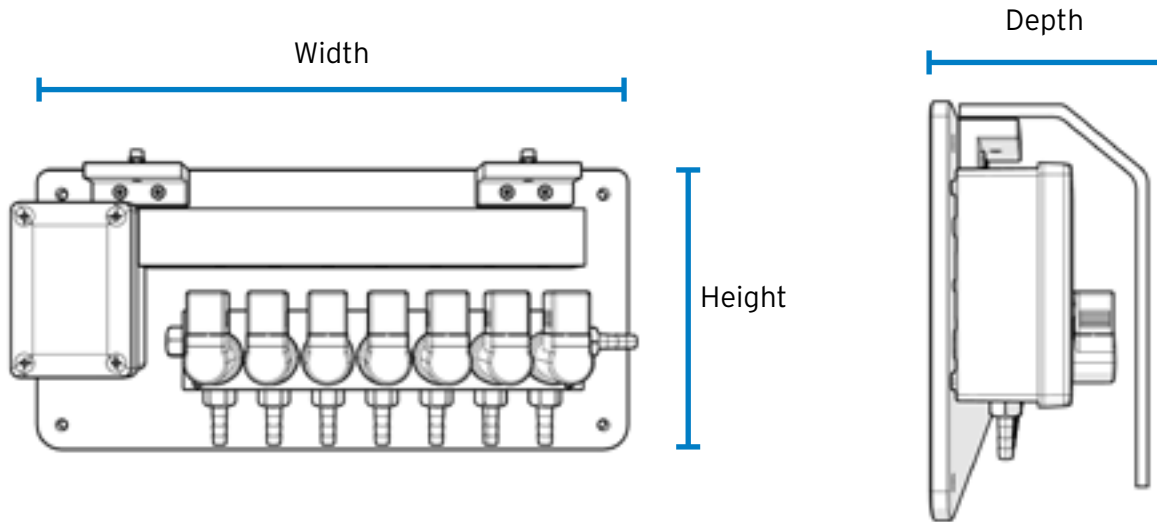

**Improved Efficiency:** Optimize chemical usage and reduce waste for a more sustainable and profitable operation.

Upgrade your system with our External Laundry Distributor Unit for consistent, high quality results with every wash. Rely on our innovation and precision to elevate your laundry operation.

### Technical Specifications

	Value
MATERIAL	Material: PP (Polypropylene) Connector: 3/8"
BARBS	Material: PVDF Connector: 3/8" - Tube 3/8"
CONFIGURATIONS	4+1 - 11+1
VALVE TYPE	Electric solenoid valves
VOLTAGE	24 VDC
CLOSURE PISTON	PTFE
RECOMMENDED WIRING	20 AWG cable
